

## What Is a Watershed?

A watershed is the area of land that drains to a particular point along a stream

1. Circle the spot where all the water drains out (ON THE ABOVE PICTURE).
2. Would this circle be the upper basin or the lower basin? \_\_\_\_\_
3. Put X's on the upper basin locations (ON THE ABOVE PICTURE). There are several.

4. Put a star (ON THE LOWER MAP ON THE PREVIOUS PAGE) where Ithaca should be. Get my help if you need it.

5. What is the name of our mini watershed in Ithaca?

---

6. How many mini watersheds are on this map?

---

7. What is the main river that will drain our watershed in Ithaca?

---

8. The Maple River and Looking Glass River both drain into what river?

---

9. If we pollute our Maple River, can that pollution float into the Flat River?

---

10. If we pollute our Maple River, can that pollution float into the Looking Glass River?

---

11. If we pollute our Maple River, can that pollution get to Grand Haven?

---

12. Where does the Grand River finally empty out to?

---

13. If people pollute the Grand River in Grand Rapids, will the pollution get to us in Ithaca?

---

14. Where would the river water be the dirtiest?

---

15. All 7 of these watersheds together are called the Greater Grand watershed. What does the Greater Grand watershed drain into?

---

16. Why are all these rivers flowing to the left and not straight down?

---

---
