

# GLOBAL WARMING STATIONS NAME\_\_\_\_\_

<p>1 How will this oxygen decrease affect different ocean populations?</p>	<p>2 What is the major problem caused by acidification?</p>
<p>3 Is the global temperature related to carbon dioxide levels? How?</p>	<p>4 What are the reasons given for why there may be massive ocean extinctions in our future?</p>
<p>5 What is the graph showing?</p> <p>Why is this happening?</p>	<p>6 How is the sea level changing? How will this impact people in the USA?</p> <p>How will this impact people globally?</p>

7 why does flooding cause an economic impact?

why does drought cause an economic impact?

why do fires cause an economic impact?

why do tornadoes cause an economic impact?

why do hurricanes cause an economic impact?

8 How does global warming increase drought?

9 Why does global warming create more fires?

How do more fires make more global warming?

10 Why is the loss of ice at the poles making global warming even worse?

11 Is this our future? What changes can we make to prevent (or reduce) this?
