

CELL ORGANELLE QUIZ

Write the name of the organelle next to its description

1. _____ Holds cell together
2. _____ Control center; has DNA for instructions
3. _____ Energy maker; makes ATP
4. _____ Makes lipids; place for ribosomes to stick
5. _____ Packages and ships
6. _____ Digests (food, invaders, waste, the whole cell)
7. _____ Protein maker
8. _____ Way stuff moves around in a cell (spreads out on its own)
9. _____ Molecule from the lungs needed by the mitochondria
10. _____ Molecule made by the mitochondria that needs to exit as a waste gas
11. _____ Type of cell that moves food and oxygen to the cell
12. _____ Place where food is picked up
13. _____ Place where oxygen is picked up and carbon dioxide is dropped off
14. _____ Place where waste materials are dropped off by the blood
15. _____ The energy needed by a cell (made by mitochondria)

Not in our simulation today ...

16. _____ Juice it all floats in

Not in our simulation today because these parts are only in plants...

17. _____ Supports; crunchy outer shell
18. _____ Stores water
19. _____ Does photosynthesis
